---

Seasonings Greetings!

The New Year is just around the corner, and for all of us at Bieman-Copland & Associates, this is a time of noteworthy re-structuring which represents a new chapter for our practice. After more than 14 years of servicing our Niagara Region community under the esteemed Bieman-Copland & Associates title, we will be changing our name. The faces will remain the same, but with some internal re-structuring taking place, a new name is also appropriate. We are pleased to announce that commencing January 2017, the name of our practice will be changed to

## ***BCA Neuropsychology Group***

What has not changed.....

- The BCA Neuropsychology Group will continue to provide services to individual and families whose lives have been disrupted by injury, medical conditions or chronic illness, including traumatic brain injury, chronic pain, posttraumatic stress, and depression and anxiety associated with adjustment to disability.
- We will continue to welcome referrals from a variety of sources, including case managers, family physicians, lawyers and insurers, brain injury programs and other rehabilitation professionals, as well as self-referrals.
- Our services will include psychotherapeutic treatment after brain injury, cognitive rehabilitation, neurobehavioural intervention, adult and pediatric neuropsychological assessment, family and community education about concussion and brain injury, general counselling in the context of injury and recovery, as well as medical-legal consultations and assessments.
- Our practice will continue to strive for excellence in the neuropsychological services we provide through collaborative goal-setting with our clients and other health providers involved in multi-disciplinary assessment and treatment.
- We are committed to ongoing professional development with respect to our treatment and assessment services, utilization of workshop and in-house training services, and other means of staying informed with policy and legislation changes impacting our clients.
- Finally, the location of our practice will also remain the same, with our main office located conveniently just off the QEW on Martindale Road, and a satellite office in Fort Erie to enable easier access for residents of South Niagara.

With re-structuring activities underway, we are eager to embark on many more years of service and committed practice in the region and community that is home to us as well. Thank you Niagara! Please feel free to call or check out our website (soon to be revised) should you have other questions.

With gratitude,

*The BCA Neuropsychology Group*
